

**BUILT TO LAST**

The HoseBuddy CPAP Hose Holder was designed by a CPAP user to ease the use of his own CPAP sleep apnea treatment after tangled hoses caused nights of frustration and lost sleep.

Sleep Apnea patients using CPAP will find the HoseBuddy Hose Holder a welcome aid.

HoseBuddy Systems provides Hose Buddy, Hose Buddy Plus and Travel Buddy, top-notch appliances for CPAP hoses, along with great customer support - a combination that can't be beat! Using steel from the USA and skilled manufacturing in North Carolina, HoseBuddy Systems provides an unbeatable product.

Through our commitment, experience, and expertise, HoseBuddy Systems has established a business relationship with our customers that will last a lifetime!

# HOSE BUDDY

The HoseBuddy CPAP Hose Holder fits between your mattress and box spring to lift your CPAP hose above you while you sleep. The arm swivels back and forth as you turn, keeping you from rolling over on the hose or having to wake up and make adjustments during the night.

# HOSE BUDDY PLUS

The HoseBuddy Plus CPAP Hose Holder includes 8" extension to accommodate extra-thick mattresses. The Hose Buddy and the Hose Buddy Plus provides a hook to hang the head gear on when not in use. The Travel Buddy does not.

# TRAVEL BUDDY

The Travel Buddy is recommended for travel use only. Designed as a light weight alternative to the Hose Buddy & Hose Buddy Plus.

All products are made of solid steel and powder coated for durability. Proudly manufactured in America using American made steel with a Lifetime Limited Warranty.
